Professional Summary

B.Tech student with hands-on experience in API development, cybersecurity, machine learning, and full-stack analytics. Skilled in building REST APIs, debugging software, analyzing network threats, and developing data-driven security solutions using Python, Java, React, and SQL. Currently developing API Sentinel, an AI-powered API security monitoring and vulnerability detection platform focused on automated security testing, real-time monitoring, and risk analysis.

Education

UPES Aug 2023 – Present
B.Tech in Computer Science (Cyber Security) **CGPA: 7.01/10.0**
S.K.D Academy Apr 2022 – May 2023
Senior Secondary School **Percentage: 70%**
S.K.D Academy Apr 2020 – May 2021
Higher Secondary School **Percentage: 87.4%**

Technical Skills

Programming Languages: C++, Python, C, Java, JavaScript
Security Tools: Burp Suite, Nmap, Wireshark, Metasploit, Hashcat, Hydra, Aircrack-ng, Zphisher, Shodan, SpiderFoot
Web Technologies: HTML, CSS, React, Node.js, Next.js, REST APIs, MySQL, PostgreSQL
Data & Machine Learning: Pandas, NumPy, Scikit-learn

Internship Experience

SAR India Digital Pvt. Ltd. – Java Development Intern June 2026 – Aug 2026
- Designed and developed RESTful APIs in Java for reliable request/response handling across services.
- Diagnosed and resolved **50+ critical API bugs**, improving system stability and preventing revenue loss.
- Validated APIs and troubleshot issues with cross-functional teams to deliver features on schedule.

Indian Bank – Cybersecurity & Networking Intern June 2025 – Aug 2025
- Analyzed cyber-fraud cases to identify attack patterns, emerging threats, and preventive controls.
- Investigated **10+ cyber-fraud complaints**, identifying recurring attack patterns and transaction-security gaps.
- Researched banking network security architecture and secure transaction infrastructure, focusing on financial-system vulnerabilities.

Projects

Healthcare Appointment & Prescription Management System – Node.js, JavaScript, HTML, CSS, MySQL
- Developed a healthcare management platform supporting **4+ core workflows** for appointment scheduling, patient records, doctor availability, and digital prescriptions.
- Designed and integrated RESTful APIs for **4+ healthcare modules**, enabling structured data management and reliable retrieval through MySQL.
- Implemented **5+ backend modules** with input validation and business logic for user management, appointments, doctor availability, prescriptions, and database operations.

Manufacturing Intelligence & Operations Analytics Platform – Python, FastAPI, React, PostgreSQL, Docker
- Built an end-to-end manufacturing analytics platform processing **100K+ synthetic records** across **5 operational domains**: production, quality, inventory, maintenance, and machine operations.
- Designed PostgreSQL schemas and optimized analytical queries using **CTEs** to generate **10+ operational KPIs** covering production efficiency, defects, downtime, and inventory.
- Developed **5+ interactive** Apache Superset dashboards and operational alerts, integrating React and FastAPI to provide real-time access to manufacturing insights.

AI Business Analyst Assistant – Python, FastAPI, React, PostgreSQL, Scikit-learn, Docker, REST API
- Built a full-stack analytics platform integrating **3 data sources**: CSV, Excel, and SQL, with automated EDA and forecasting.
- Developed an executive dashboard generating automated reports in **2 formats**: PDF and HTML.
- Secured REST APIs with JWT authentication and RBAC for controlled business-data access.

Achievements

- Best Performer at Roots2Bloom and BCBSS internships.
- Winner, BRR Negotiation Skills Competition among **20 participants**.
- Ranked in the **Top 5%** among 200 students in Intra-College Chess Competition.
